cover potential losses They are the safety nets in the face of unexpected events

Mutual Funds Investment vehicles that pool money from multiple investors to invest in a diversified portfolio of securities Imagine a basket of investments managed by professionals

HowTo Understanding Key Concepts Lets tackle some crucial concepts with practical examples

1 Time Value of Money TVM This fundamental concept emphasizes that money available today is worth more than the same amount in the future due to its potential earning capacity

Example Would you rather have 100 today or 100 in a year Most would choose today because you could invest that 100 and earn interest making it worth more than 100 in a year Many online calculators can help calculate the future value or present value of money given an interest rate and time period

2 Risk and Return Higher potential returns often come with higher risk This is a fundamental tradeoff in investing

Example Investing in a highgrowth tech startup carries significantly higher risk than investing in government bonds However the potential return on the startup could be substantially larger but theres a greater chance of losing your investment

3 Diversification Spreading investments across different asset classes to reduce risk

Example Instead of putting all your money into one stock you diversify by investing in stocks bonds real estate and other asset classes This reduces the impact of a downturn in any single asset
